### President's comments

*"The sales increased 6 per cent during the fourth quarter, while operating profit, excl. non-recurring items, was at the same level as previous year. The sales increased, thanks to the acquisitions, during the year. However, we saw organically a negative sales development in the quarter driven by a continued softening in demand. We are very pleased with the acquisition of Preferred Compounding and together we will be able to continue to develop our compounding business in America. Following the integration at Preferred Compounding has a restructuring project been initiated in order to optimize the operations and extract cost synergies, among other things two production units in US were closed during the quarter. During the full year 2019, the sales increased 13 per cent while earnings per share, excl. non-recurring items increased slightly compared to the previous year. Operating cash flow was strong and increased by 29 per cent. Our financial position remains strong and we are well equipped for further expansion."*

Mikael Fryklund, President and CEO

### Fourth quarter of 2019

The HEXPOL Group's sales (including the acquired Preferred Compounding) increased by 6 per cent to 3,774 MSEK (3,557) during the quarter. Acquisitions increased the sales by 15 per cent, exchange rate fluctuations by 4 per cent, while the organic sales decreased by 13 per cent.

Operating profit, excluding non-recurring items, amounted to 522 MSEK (522) which means that the corresponding operating margin amounted to 13.8 per cent (14.7). The operating margin was affected by lower organic volume, acquisitions and amortisations of acquired intangible assets. The lower organic volume was affected by generally softer market demand, which was further strengthened by increased insourcing in terms of basic compounds at some Rubber Compounding customers. When sales at customers with own mixing capacity drop, they tend to insource some more. We also saw a sharp decline in so-called Tire & Toll volumes compared to the previous year, volumes that we temporarily produce as support when the customers have the needs. Further, our customers closed down longer than usual during the Christmas holidays, following by how the holidays occurred this year, which also affected the demand negatively at year-end. Operating profit amounted to 423 MSEK (522). Operating profit before amortisation of intangible assets and excluding non-recurring items, EBITA, increased slightly to 543 MSEK (533), which means that the corresponding EBITA margin amounted to 14.4 per cent (15.0). Exchange rate fluctuations affected the operating profit positively by 18 MSEK in the quarter.

Non-recurring items, referring mainly to integration- and restructuring costs, amounted to 99 MSEK.

Operating profit, EBIT	394	486	1 910	2 006

HEXPOL Compounding's sales (including the acquired Preferred Compounding) increased by 7 per cent to 3,524 MSEK (3,301), during the fourth quarter. Operating profit, excl. non-recurring items, increased to 493 MSEK (486) and the corresponding operating margin amounted to 14.0 per cent (14.7). The operating margin was affected by lower organic volume, acquisitions and amortisation of acquired intangible assets. Operating profit amounted to 394 MSEK (486).

The raw material prices on our main raw materials were slightly lower than the corresponding quarter last year.

The volume was higher in Americas but lower in Europe, while the volumes in Asia were stable. Adjusted for the acquired operations in Preferred Compounding the volumes were lower in Americas. The lower organic volume was affected by generally softer market demand, which was further strengthened by increased insourcing in terms of basic compounds at some Rubber Compounding customers. When sales at customers with own mixing capacity drop, they tend to insource some more. We also saw a sharp decline in so-called Tire & Toll volumes compared to the previous year, volumes that we temporarily produce as support when the customers have the needs. Further, our customers closed down longer than usual during the Christmas holidays, following by how the holidays occurred this year, which also affected the demand negatively at year-end.

HEXPOL Compounding Americas sales were higher during the quarter. However, the sales were lower excluding the acquired Preferred Compounding. The sales increased to automotive related customers and to customers within building & construction, engineering & general industry. Adjusted for the acquired operations in Preferred Compounding the sales were however significantly lower to automotive related customers but increased to customers within building & construction and were lower to customers within engineering & general industry.

Sales in HEXPOL Compounding Europe decreased slightly during the quarter. Sales were stable to automotive related customers and to building & construction but decreased to customers within engineering & general industry.

HEXPOL Compounding Asia's sales were lower during the quarter, mainly due to lower demand from automotive related customers in China.

HEXPOL TPE Compounding's sales were slightly lower during the quarter.

HEXPOL TP Compounding's sales were lower during the quarter, mainly affected by lower sales to automotive related customers.

Non-recurring items, referring mainly to integration- and restructuring costs, but also acquisition- and legal expenses, amounted to 99 MSEK.

Costs during 2019 includes mainly the closing of two production units and Preferreds head office as well as adjustment of overhead organisation. Depending of the development of the general market in America during 2020, further adjustment of capacity might be needed, which at present is calculated to an expense of approximately 10 MUSD. Cost synergies are estimated to amount to approximately 5 MUSD during 2020 and to approximately 9 MUSD on an annual basis after the integration- and restructuring projects are completed, which is expected to be completed in the end of 2020.
